Summary of Issues

Annapolis Post Office Renovation and Addition: The U.S. Postal Service has agreed to a \$3.2 million purchase of the Post Office Building by the State, subject to a lease back of 4,200 of the 13,000 gross square feet (GSF) in the current building for up to 20 months. The Department of General Services (DGS) has added construction for a 15,000 GSF expansion to the scope of the project raising the total cost from \$8.1 million to \$12.9 million. DGS anticipates bringing the acquisition for approval to the Board of Public Works (BPW) in April 2014. **DGS should comment on plans to work with the building’s historical zoning restrictions and any potential cost overruns that might stem from the historical nature of the building.**

Summary of Updates

Construction Contingency Fund: The current *Capital Improvement Program* (CIP) anticipates authorizations to the Construction Contingency Fund in fiscal 2016, 2017, and 2018 of \$2.5 million in each fiscal year. Given the current economic conditions, favorable bidding climate, and the current fund balance, DGS has sufficient unencumbered funds remaining to maintain program activity without authorizations in fiscal 2014 and 2015.

Summary of Recommended Bond Actions

1. Old Senate Chamber Reconstruction

Approve funding for the Old Senate Chamber Reconstruction.

2. Annapolis Post Office Renovation and Addition

Approve funding for the Annapolis Post Office Renovation and Addition.

3. Facilities Renewal Fund

Approve funding for the Facilities Renewal Fund.

4. Fuel Storage Tank System Replacement Program

Approve funding for the Fuel Storage Tank System Replacement Program.

DE0201 – Board of Public Works

5. Board of Public Works Underground Heating Oil Storage Tank Replacement Program

Approve de-authorization of general obligation bond funds in the Underground Heating Oil Storage Tank Replacement Program.

6. Board of Public Works Ethanol Fueling Stations

Approve de-authorization of general obligation bond funds in the Ethanol Fueling Stations program.

Budget Overview

Major changes in the 2013 CIP within the BPW budget include:

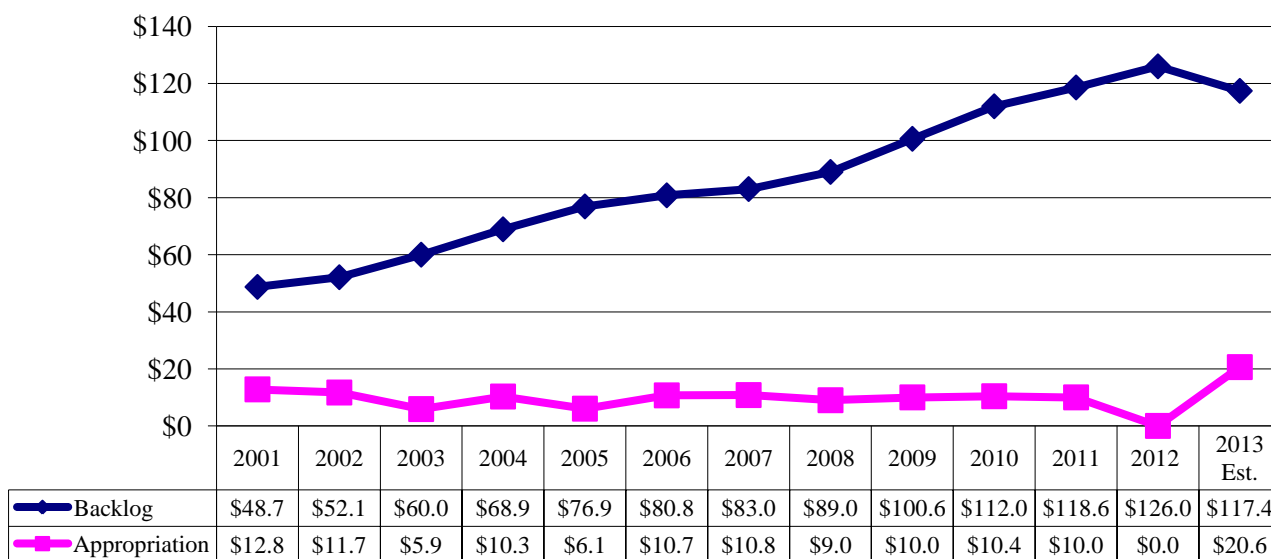

- The Facilities Renewal Program appropriation increases from a planned \$7.5 million to \$15.0 million in fiscal 2014.
- A new Fuel Tank Storage Replacement program will provide dedicated funds to replace fuel tanks with environmental compliance issues at the end of their lifecycle.
- The Annapolis Post Office Building project now includes a 15,000 GSF expansion and construction component.
- The Old Senate Chamber Reconstruction project is entering construction and its final year of appropriations.

Facilities Renewal Program

The Facilities Renewal Program provides funds for the repair and rehabilitation of State-owned capital facilities. Appropriations to the Facilities Renewal Program are projects that cost between \$100,000 and \$1,000,000, excluding higher education projects which are funded through separate appropriations.

The Facilities Renewal Program is a continuing long-term effort which will require funding beyond fiscal 2018. As **Exhibit 1** shows, the current backlog for projects is over \$117 million.

Exhibit 1
Facility Renewal Funding and Backlog
Fiscal 2001-2013
(\$ in Millions)

Source: Department of General Services

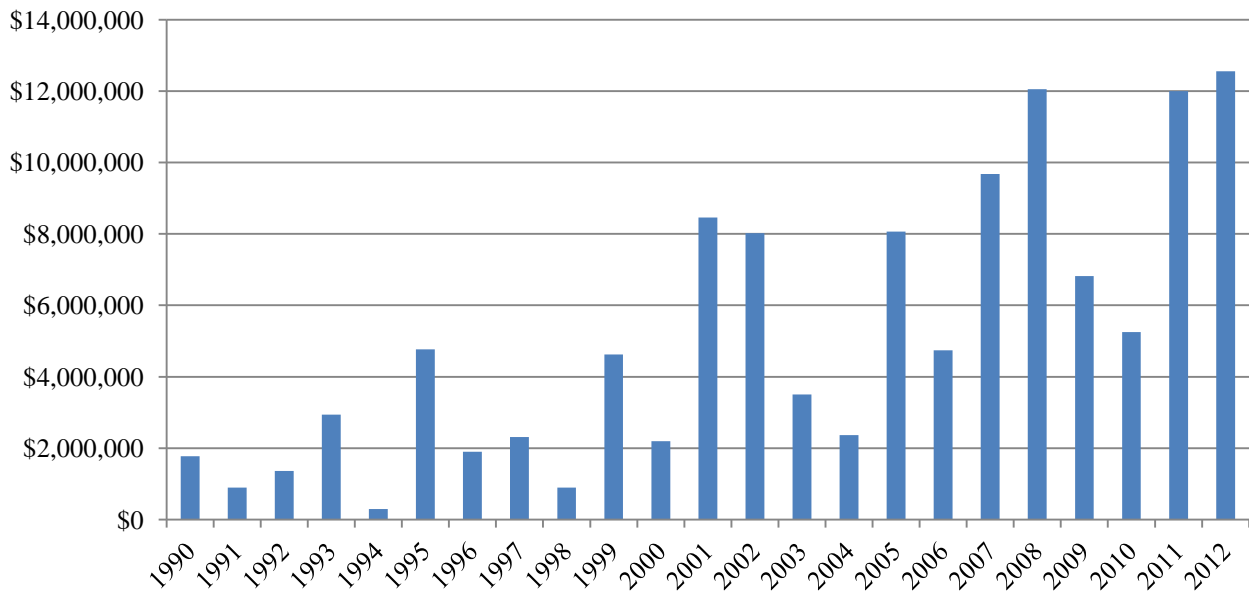

The fiscal 2014 allowance provides \$15.0 million in general obligation (GO) bond funding each year in the CIP, which would allow DGS to reduce the size of the backlog each year. The \$15.0 million in the allowance represents an amount double what was originally planned in the 2013 CIP and follows a \$20.6 GO bond appropriation in fiscal 2013.

As depicted in Exhibit 1, DGS received no appropriation in fiscal 2012 for the program, based on outstanding unencumbered authorizations. At the beginning of fiscal 2011, DGS had \$25.1 million in unencumbered funds within the facility renewal program. However, by the end of fiscal 2012, DGS reported only \$2.4 million in unencumbered funds. This was accomplished in part through hiring additional contractual project managers.

Subsequent to encumbering outstanding appropriations, DGS received \$20.6 million in fiscal 2013. Halfway through the 2013 fiscal year, DGS reports only minimal encumbrances. However, many projects in the backlog require a three- to four-year process that includes design before a project moves into construction and is considered encumbered. Though the 2013 funds are largely unencumbered, the appropriation allows DGS to initiate the multi-year process for the list of projects included in the request. As such, the current level of unencumbered funds represents a more normal course of business than in prior years where significant amounts of funds were unencumbered from smaller appropriations across multiple fiscal years.

In addition to the \$23.0 million in planned projects to be encumbered using unencumbered prior year funds available during fiscal 2013, DGS anticipates funding 44 projects at a cost of \$15.0 million using the fiscal 2014 appropriation. A \$15.0 million appropriation will allow DGS to reduce the backlog. The amount of the reduction depends on how many new projects are added to the list during the relevant period. As **Exhibit 2** depicts, in calendar 2011 and 2012, between \$12.0 million and \$12.6 million in projects were added each year, though these amounts represent the highest volume since 1990. **Appendix 3** shows the cost of projects on the backlog by agency. The majority of the total backlog cost stems from projects within DGS, the Department of Public Safety and Correctional Services, and the Department of Health and Mental Hygiene.

Fuel Tank Storage Replacement Program

The 2013 CIP includes a one-time GO bond appropriation of \$1.4 million in the fiscal 2014 allowance for a new Fuel Tank Storage Replacement Program. The program will fund the replacement and maintenance of fuel tanks. Most fuel tanks in the State are currently at the end of their expected useful lives, which average 30 years. As maintenance has lapsed and the tanks age, the tanks fail environmental inspections. The Maryland Department of the Environment conducts inspections on an annual basis, though some tanks are past due on inspections and many are not in compliance with environmental regulations. Without replacement and/or repair of the tanks, State agencies risk federal fines of up to \$100,000 for violations, in addition to the environmental damage caused by leaking fuel.

The Maryland State Police (MSP) currently has significant issues with its fuel storage tanks. According to MSP, the agency currently has no sites in compliance with all environmental regulations pertaining to the underground petroleum storage tanks.

In order to address this ongoing need, the 2013 CIP creates a new Fuel Tank Storage Replacement Program. Although the 2013 CIP only includes funding for fiscal 2014, it is anticipated that the fuel tank program will be a long-term, ongoing program to provide for the maintenance and replacement of fuel tanks. It is anticipated that appropriations in fiscal 2014 will go toward addressing compliance-related issues with fuel tanks stored on MSP properties. Estimates for these tanks alone indicate that replacement will cost approximately \$4.3 million over three years.

Simultaneous to the creation of this new program, the Ethanol Fueling Stations and Underground Heating Oil Storage Tank Replacement programs are de-authorized in the budget for a total de-authorization of \$1.3 million, providing an implicit transfer of GO bond capacity for the related fuel tank storage program.

Based on how the new Fuel Tank Storage Replacement Program was developed, activities that were originally funded under the Heating Oil Storage Tank Replacement Program and other nonvehicle fuel storage tanks will not be eligible for funding under the new program – even though there are outstanding replacement and maintenance needs for these types of tanks. As such, these types of projects will be placed on the Facility Renewal project list, as projects eligible for the new program currently on the Facility Renewal list migrate to the new program.

Annapolis Post Office Renovation and Addition

The 2012 CIP originally anticipated a total of \$8.1 million in GO bond funds to acquire and renovate the Annapolis Post Office Building. Under the 2014 CIP, the total cost has increased to \$12.9 million due to new plans to construct additional office space. The CIP includes \$351,000 in design costs in fiscal 2014, followed in future fiscal years by \$8.4 million for construction, \$150,000 for equipment, and an additional \$200,000 for planning.

Old Senate Chamber Reconstruction

The 2007 State House Visitor Experience Master Plan was commissioned by the Maryland State Archives in 2006 at the request of the State House Trust in an effort to improve the visitor experience in the historical State House. The master plan represents a guiding document for the development of the State House over a multi-year period into a first rate tourist attraction while maintaining the building as a functional working State House Building. The recently completed Old House Chamber restoration project represents the nineteenth century interpretation of the building while the proposed Old Senate Chamber project constitutes the eighteenth century interpretation; the legislative chambers, currently in use by the Senate and House of Delegates, represent the twentieth and twenty-first century historical interpretations envisioned in the master plan.

The Old Senate Chamber Reconstruction project is intended to correct historical inaccuracies in the current space and address much needed infrastructure problems. The Old Senate Chamber has undergone several renovations over the years that archivists have determined to be both historically inaccurate and detrimental to the interior and exterior appearance of the building. Prior efforts focused on historical interpretation that used materials and techniques that proved to be incompatible. As a result, much of the interior space is degraded and in need of repair. The building also needs modern museum grade infrastructure systems such as heating, ventilation, and air conditioning; fire suppression systems; and fire alarm and detection systems that must be installed without impacting or compromising the current and future authentic restorations.

Due to delays in the project schedule, a \$3.0 million appropriation for fiscal 2013 was converted to a pre-authorization for fiscal 2014. In addition to this \$3.0 million pre-authorization, the 2012 CIP anticipated an appropriation of \$2.1 million in GO bond funds to complete the project. The fiscal 2014 allowance was reduced by \$250,000 due to the ineligibility of art conservation for GO bonds. The total recommendation for fiscal 2014 is, therefore, now \$4.85 million instead of the anticipated \$5.1 million. Construction is scheduled to begin in early 2013, with a completion schedule for December 2014.

Issues

1. Annapolis Post Office Addition

The Annapolis Post Office Building is currently owned and occupied by USPS. USPS has agreed to a \$3.2 million purchase by the State, subject to a lease back of 4,200 square feet at \$7,000 per month (\$20 per square foot) for a period of not less than 8 months and not more than 20 months. DGS anticipates bringing the acquisition for approval to BPW in April 2014. Construction is scheduled to begin on the 15,000 GSF expansion subsequent to USPS leaving the space at the end of the lease.

The additional 15,000 GSF would provide a total of 28,000 GSF following the departure of USPS. This amount of GSF is larger than the majority of leased office spaces by State agencies in the Annapolis area and may provide some advantages given the proximity of the building to the State House and legislature in the State Circle Complex. A determination on occupancy, however, will not be made until after the acquisition in order to evaluate the timing of the expiration of leases at that time.

Based on a cost-benefit analysis conducted by DGS and produced in response to a *Joint Chairmen's Report* request, the net present value of the \$3.2 million purchase scenario and subsequent expansion is financially equivalent to a 2012 base rent of \$20.33 per square foot. Based on DGS' analysis of market rental rates in the historic Annapolis area, this rate is competitive.

The current cost estimates, shown in **Appendix 2**, may be a low estimate, given the need to provide a continuity of services during building renovation since the building will continue to be occupied by USPS. The estimate may also be low due to the building's historical nature which could potentially increase costs on a comprehensive renovation.

DGS should comment on plans to work with the building's historical zoning restrictions and any potential cost overruns that might stem from the historical nature of the building.

Update

1. Construction Contingency Fund

Section 3-609 of the State Finance and Procurement Article establishes the Construction Contingency Fund (CCF) as a supplementary funding source for State construction projects. Expenditures from the fund must be approved by BPW and may only be used for State-owned capital projects that have already received funding authorization from the General Assembly in instances where the prior authorized funds are insufficient to fund the initial construction award or to cover change orders that do not increase the scope of a project. **Appendix 1** shows the CCF funding uses and sources from calendar 2003 through the end of calendar 2012. The last time the State provided direct authorization to the fund was in the 2008 session. The current CIP anticipates authorizations to the fund in fiscal 2016, 2017, and 2018 of \$2.5 million in each fiscal year. Given the current economic conditions, favorable bidding climate, and the current fund balance, DGS has sufficient unencumbered funds remaining to maintain program activity without authorizations in fiscal 2014 and 2015. Subsequent to a \$386,112 expenditure for the Sandy Point State Park Bulkhead, the fund had a \$4,706,729 ending balance in calendar 2012.

Summary of Other Projects in the Capital Improvement Program

No independent projects were deferred in the BPW budget. As shown in **Exhibit 3**, the Asbestos Abatement Program was removed from the CIP based on substantial completion of the program. The program received \$2.0 million in fiscal 2013 and was originally programmed in the fiscal 2013 CIP for \$2.0 million in fiscal 2014.

Exhibit 3
Projects Removed from the *Capital Improvement Program*
Fiscal 2014
(\$ in Millions)

<u>Project</u>	<u>Description</u>	<u>Reason for Removal</u>
Asbestos Abatement Program	The program corrected imminent health conditions by abating asbestos in State-owned facilities. Projects were identified through asbestos surveys and routing inspections of facilities.	Funding for this program has been deleted from the <i>Capital Improvement Program</i> because the most imminent health hazards at State facilities have been addressed. Future funding for asbestos abatement projects will be funded through the University System of Maryland's Capital Facilities Renewal program or DGS's Facilities Renewal Fund.

Source: Department of Budget and Management, Fiscal 2014 *Capital Improvement Program*

Pre-authorizations and De-authorizations

As shown in **Exhibit 4**, there are two related de-authorizations and no pre-authorizations in the fiscal 2013 budget. Both the Ethanol Fueling Stations and Underground Heating Oil Storage Tank Replacement programs are de-authorized to provide GO bond capacity for the new Fuel Tank Storage Replacement Program.

Exhibit 4 De-authorizations

<u>Project</u>	<u>De-authorized Amount</u>	<u>Reason</u>
BPW Ethanol Fueling Stations	\$50,000	Project substantially complete. GO bond funding capacity used under new Fuel Tank Storage Replacement Program.
BPW Underground Heating Oil Storage Tank Replacement Program	1,250,000	GO bond funding capacity used under new Fuel Tank Storage Replacement Program.

BPW: Board of Public Works

GO: general obligation

GO Bond Recommended Actions

1. Approve funding for the Old Senate Chamber Reconstruction.
2. Approve funding for the Annapolis Post Office Renovation and Addition.
3. Approve funding for the Facilities Renewal Fund.
4. Approve funding for the Fuel Storage Tank System Replacement Program.
5. Approve de-authorization of general obligation bond funds in the Underground Heating Oil Storage Tank Replacement Program.
6. Approve de-authorization of general obligation bond funds in the Ethanol Fueling Stations program.
